Overall impression of program

 Copy

20 responses

	Excellent	Good	Average	Poor
Ability to apply knowledge of basic sciences and engineering fundamentals	12	7	1	0
Ability to plan/analyze/design software products	10	9	1	0
Ability to find solutions for problems in the processes with due consideration of public health,	11	8	1	0

safety and environment				
Ability to use modern tools and techniques	10	8	2	0
Ability to understand societal needs, environmental issues and professional ethics	12	6	2	0
Ability to work as an individual and as a member of team	14	5	1	0
Ability to communicate effectively	13	6	1	0
Ability to manage projects in multidisciplinary environment	10	8	2	0
Ability to engage in lifelong learning process	15	4	1	0
Overall impression of program	12	7	1	0

Feedback analysis on curriculum given by alumni: -

The majority of alumni members are satisfied with the ability to apply engineering fundamentals that are appropriately delivered, and nearly 95% of alumni are satisfied with the plan, analyse, and design of software product development and processes content. Almost 95% are satisfied with the content of finding solutions for problems in the processes with due consideration of public health, safety and the environment. 90% of alumni members are satisfied with the delivery of knowledge regarding the use of modern tools and techniques used. 90% percent of alumni members are happy with how seminars are run and how projects are carried out in teams. Most of alumni thinks that their communication is improved through different courses like seminar, project presentation and soft skills. Most of the alumni thinks that it department develops lifelong learning habits in students. Almost all the alumni members are happy with the overall curriculum of the programs.
