Feedback analysis on curriculum given by employers: -

From the Employer feedback, it is observed that most employers are happy with the content of the curriculum. 82.2% of employers say that the syllabus covers all the fundamental aspects of computer science and engineering which are required in the industry. About 80% employers thinks that there are adequate number of elective courses offered by the department to learn about the one particular domain. 75.5% of employers observed that curriculum structure is adequate for bridging the gap between the industry standards and academics and meets the industrial needs. This indicates that there is still scope to improve the curriculum to add courses based on industry practices. 71.1% of employers are satisfied with the requirements to provide practical experience through projects, internships and other means. 68.9% of employer thinks that the evaluation techniques are well balanced with the proper evaluation techniques. Also, some of the employers suggested that there must be content on react js, NodeJS, AI, ML and python.
